REMOTE ENVENOMATION CONSULTANCY SERVICES (RECS) – THE MALAYSIAN EXPERIENCE

Ahmad Khaldun Ismail

Department of Emergency Medicine, Hospital Canselor Tuanku Muhriz

Abstract: The speaker will bring the attention of the audience to the current issues pertaining to Clinical Toxinology in Malaysia and the clinical management support for animal bites and stings (& poisoning) with particular emphasis on snakebite envenoming for Malaysia and neighboring countries.

Learning Journey:

1. To identify the issues with Clinical Mx of envenoming (& poisoning) in Malaysia
2. To introduce the objectives of Remote Envenomation Consultancy Services (RECS)
3. To share some of the experiences, challenges and success of RECS MY

Methods: The consultation log of the primary RECS consultant was reviewed and analyzed. Data was descriptively presented.

Results: The number of RECS consultation has been increasing every year since its establishment in 2012.

Conclusion: This reflects a strong demand for RECS in Malaysia.
