# VIRTUAL SEMINAR

## CLINICAL CASE:

A 55-year-old woman (60kg) with a history of Mediterranean fever, chronic kidney disease, depression, vertebral arthrosis, and hypercholesterolemia was admitted for self-poisoning. She had recently been treated for tracheo-bronchitis with acetaminophen and clarithromycin, and had taken ketoconazole for a vaginal infection. At 8:00 pm, she called her sister to report ingesting Colchicine 30mg, Tramadol 750mg, Venlafaxine 1.5g, and Pravastatin 400mg two hours prior and presented with diffuse abdominal pain, vomiting, and diarrhea upon admission. At 10:00 pm, she presented Glasgow coma score 13; BP 90/50mmHg, HR 120/min; RR 13/min, SpO2 95% on room air. Physical examination showed tender abdomen and normal cardiothoracic auscultation

## SUBJECTS & PRESENTERS

- A 55-year-old woman (60kg) with a history of Mediterranean fever.....  
Prof. Bruno Mégarbane
- A look inside the New Zealand National Poisons Centre  
Lucy Shieffebien

**4<sup>th</sup> March 2024 at**

20.00PM NZST (New Zealand) / 18.00PM AEST / 16.00PM MYT / 14:00 PM ICT(Jakarta) / 13:30PM IST /  
11.30AM IRST / 11.00AM AST / 10.00 AM EET / 9.00AM WAT/ 9.00AM WEST/ GMT 8.00 AM/ EDT 4.00AM
